Novo Nordisk, Secondary Pack team, Hillerod
Attn: Martin Schlie Egholm

Application: Design Engineer, Secondary Packaging and Consumer Experience

Dear Martin Schlie Egholm,

I am applying for the Design Engineer role in Secondary Packaging. I am a mechanical engineer finishing my PhD at Aalborg University, and I also hold a Diploma in Fine Arts in painting. This role is one of the few I have seen that asks for both sides of me: the engineer who builds and tests, and the artist who cares how things look and feel.

In my PhD I designed a shoulder exoskeleton that people wear on their body. I started with hand sketches, modelled it in SolidWorks, and rebuilt the 3D-printed parts many times until they fitted well and held up in testing. We tested it with 12 people, and watching them use it changed how I thought about comfort and clarity. My own contribution was the design idea, a spring that carries most of the arm's weight so a small motor is enough, plus the CAD, the prototypes and the sensor integration. It cut energy use by more than 25% and won the Best Paper Award at IFToMM ISRM 2026.

I use Adobe Illustrator, Photoshop and Procreate for visuals, and I am used to presenting and defending design choices to engineers, clinicians and students. I have not worked with cartons, leaflets or printing processes yet, and I would learn them quickly in your team.

Thank you for considering my application. My portfolio is at arunabha22.github.io/arunabha-majumder.

Kind regards,
Arunabha Majumder
